

Be prepared before you go solar.

Solar Checklist

Understand how solar works and what rebates are available to you.

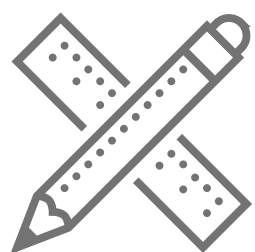

Identify how much electricity you use and when you use it, and if you should invest in a battery.

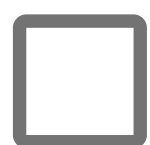

Learn the difference between affordable and premium systems, how products effect the systems peformance.

Research CEC installers. Check the reviews and how old a company is. Proven longevity shows that warranties will be more likely available in time.

Request at quote and discuss the design they have provided. Learn why they recommended certain products.

Receive multiple quotes to compare.

We are committed to ensuring that safe and quality solar systems are installed on Australian homes.
